

KENG-HO LIN (Cindy)

Product Designer

Product Designer with 7 years of experience transforming complex backend logics—from Fintech trading to Martech setups—into high-trust digital experiences. Recognized for profound domain expertise in crypto derivatives and contract trading systems that directly drive user retention. Proven track record in establishing scalable UX frameworks to eliminate team rework, and pioneering GenAI integration within design workflows to maximize collective delivery velocity.

🔑 EXPERTISE

Product Strategy
UX Architecture
Information Architecture
Interaction Design
Cross-Platform UI Design
Scalable Design Systems
User Research & Testing
User Journey Mapping
Advanced Prototyping
Frontend Alignment
AI Workflow Optimization

🏆 AWARD

2019
IDC Design Battle of the
Warring States
- First Prize Bronze Award

2018
Red Dot Award,
Communication Design
- Best of the Best

💼 EXPERIENCE

Product Designer | 2024.07 - Present Kela (Fintech)

- Own end-to-end UI/UX architecture for Web/App crypto exchange, optimizing high-frequency trading flows and advanced portfolio management to drive user retention.
- Deconstruct complex matching engine logics and compliance protocols to build comprehensive UX frameworks, translating technical complexities into institutional-grade interfaces while streamlining PRDs to eliminate engineering rework.
- Led platform-wide Design System synchronization, defining standardized visual components and precise technical specifications (Specs) to guarantee cross-platform consistency and optimize developer handoffs.
- Pioneered Generative AI integration within design workflows, formulating actionable methodologies that accelerated team delivery velocity and collaborative innovation.

Sr. UI/UX Designer | 2021.10 - 2024.06 AccuHit (Martech)

- Spearheaded the UX refactor of "AccuNIX" (Conversational Commerce Platform), defining core problem frameworks to guarantee top-tier pre-launch quality.
- Deployed a scalable, cross-departmental Design System, streamlining developer handoffs and eliminating visual fragmentation.
- Shipped 30+ large-scale omni-channel projects across Insurance, E-commerce, and Real Estate, mapping intuitive user journeys across Web, App, and LINE LIFF.
- Partnered with AM, PM, and Engineering to orchestrate seamless project lifecycles from concept to on-time deployment.

UI/UX Designer | 2019.07 - 2021.09 Cameo (AR/VR/Interaction)

- Orchestrated spatial interactions for 10+ government and educational tenders, translating user insights into immersive AR/VR exhibition flows.
- Executed high-fidelity UI designs for Web/App ecosystems, optimizing user experience patterns while navigating technical backend constraints.
- Designed strategic visual collateral and interactive presentations that elevated tender competitiveness and brand positioning.
- Bridged design and engineering via frontend knowledge (HTML/CSS) to streamline website deployment and multimedia production.

🎓 EDUCATION

Masters in Interaction Design | 2018 - 2020 National Taipei University of Technology

- 2019 - Outstanding Domestic Graduate Award
- 2020, "On-Site Spatial Navigation and Study of Chinese Scholar Garden with Design Strategies of Yuan-Ye from Ming Dynasty through Application of Augmented Reality : A Case Study of Banqiao Lin Family Garden"

Bachelor of Interaction Design in the Department of Media Design | 2014 - 2018 Tatung University

- Scholarship for Outstanding Character and Academic Excellence for 6 semesters.
- 2018, NSTC Research Program, The Impact of Augmented Reality Product Catalog Application on Consumers' Acceptance of Technological Innovation and Brand Experience Evaluation.
